BINANCE SMART CHAIN

Put your ETH to work on the blockchain.

A cycle-based ETH investment plan on Binance Smart Chain (BEP20) with daily profit, 20-level team income, Star ranks and two daily pools, all executed by smart contract.

0.01 ETH MIN ENTRY | UP TO 1.2% DAILY | UP TO 36% MONTHLY | 6 INCOME STREAMS | BEP20 · BNB SMART CHAIN

POWERED BY BINANCE SMART CHAIN (BEP20) SMART CONTRACT · 100% ON-CHAIN

CYCLEETH

What is a Smart Contract?

A smart contract is a program stored on the Binance Smart Chain (BSC) blockchain. Your investment is made in ETH (BEP20 token). It holds the plan rules as code and runs them automatically. Nobody, including the platform owner, can change the rules or touch member funds outside those rules.

How It Works

1. **Rules are written as code**
   Slabs, daily profit, 70/30 profit split, level income and pools are fixed inside the contract before launch.
2. **Deployed on Binance Smart Chain**
   Once deployed, the code is immutable. It cannot be edited, paused or reversed by anyone.
3. **You invest from your own wallet**
   Your ETH goes straight to the contract address. No login, no bank, no middleman holding your money.
4. **Contract pays automatically**
   Daily profit, direct income and pool shares are calculated and credited by the code, 24/7.
5. **Everything is public**
   Every deposit, payout and balance is visible on BscScan. Anyone can verify it at any time.

100% On-Chain

Every transaction is recorded permanently on the Binance Smart Chain blockchain.

Immutable Rules

Plan logic cannot be altered after deployment, by anyone, ever.

No Admin Control

No human can freeze, block or redirect member funds.

Instant Payouts

Income is credited the moment the condition is met, with no manual approval.

Transparent

Any member can audit balances and payouts on a public block explorer.

Trustless by Design

You trust the code, not a person. The code is the contract.

THE CODE IS THE CONTRACT · NO TRUST IN PEOPLE NEEDED · VERIFIED ON BSCSCAN

CYCLEETH

The Plan at a Glance

CycleETH runs in short investment cycles. You invest ETH, receive a fixed daily profit for the length of your cycle, renew, and then withdraw capital together with profit. Every rule below is enforced by the smart contract.

MINIMUM INVEST

0.01 ETH

Start with as little as 0.01 ETH in the entry slab.

MAXIMUM INVEST

6 ETH

Highest slab, highest daily rate and longest cycle.

MONTHLY RETURN

Up to 36%

Top slab pays 1.2% per day, which is 36% over 30 days.

CYCLE LENGTH

7 – 15 Days

The bigger the slab, the longer the cycle and the higher the daily rate.

RENEWAL

1 : 1

Renew with the same amount or a higher amount when a cycle ends.

GOLDEN RULE

Renew first, then withdraw

Every cycle: renew your plan, then withdraw total capital with profit.

SMART CONTRACT ENFORCED · NO MANUAL PROCESSING · EVERY PAYOUT VERIFIABLE ON-CHAIN

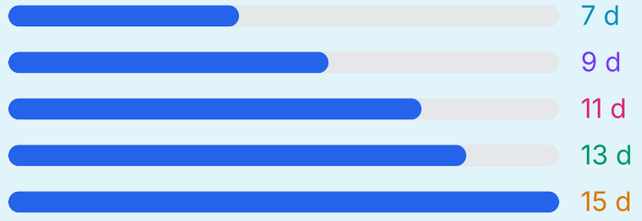

CYCLEETH

Five Slabs · Daily Profit by Investment

Every slab starts from 0.01 ETH. Each slab has its own maximum, cycle length and daily rate. All amounts in ETH.

SLAB	MINIMUM	MAXIMUM	CYCLE DAYS	DAILY PROFIT	PROFIT / CYCLE
SLAB 1	0.01	0.10	7	0.5%	3.5%
SLAB 2	0.01	1.00	9	0.7%	6.3%
SLAB 3	0.01	2.00	11	0.9%	9.9%
SLAB 4	0.01	4.00	13	1.0%	13.0%
SLAB 5	0.01	6.00	15	1.2%	18.0%

Daily Rate Scaling

Example · 6 ETH in Slab 5

6 ETH × 1.2% = **0.072 ETH / day**
15 days × 0.072 = **1.08 ETH profit per cycle**
Two cycles in a month ≈ **36% monthly**

SLAB 1
Invest from 0.01 up to 0.1 ETH.
Next invest: **same or more**.

SLAB 2
Invest from 0.01 up to 1 ETH.
Next invest: **same or more**.

SLAB 3
Invest from 0.01 up to 2 ETH.
Next invest: **same or more**.

SLAB 4
Invest from 0.01 up to 4 ETH.
Next invest: **same or more**.

SLAB 5
Invest from 0.01 up to 6 ETH.
Next invest: **same or more**.

Note: Slabs are completed one by one. Every user starts in Slab 1 and moves to the next slab only after completing the previous one. **No direct entry into any slab.**

EVERY NEW INVESTMENT MUST BE EQUAL TO OR MORE THAN YOUR LAST ONE

CYCLEETH

The Investment Cycle Lifecycle

One cycle = one slab period (7 to 15 days). When the cycle expires, you renew first and only then withdraw your total capital together with the profit.

1

Invest

Start in Slab 1 with 0.01 to 0.1 ETH. Each completed cycle moves you to the next slab.

2

Earn Daily

Receive 0.5% to 1.2% profit every day for the full length of your cycle.

3

Cycle Expires

After 7 to 15 days the cycle ends. Capital and profit are ready for the next step.

4

Renew 1 : 1

Re-top-up with the same amount or a higher amount. Renewal is mandatory before withdrawal.

5

Withdraw

Withdraw total capital plus profit. Then the new cycle keeps paying you daily.

Plan Expiry · Option A · Re-Top-Up

Renew the plan with the **same amount** or an **increased amount**. Each renewal moves you to the next slab with a better daily rate, slab by slab.

Plan Expiry · Option B · Withdrawal

Withdraw **capital + profit**, but you must **reinvest before withdrawal** with the same amount or above. This keeps every account active in the system.

EVERY CYCLE · RENEW FIRST · THEN WITHDRAW TOTAL CAPITAL WITH PROFIT

CYCLEETH

70 / 30 Profit Split

When your cycle completes and you renew, your capital comes back in full. Only the cycle profit is split by the smart contract: 70% is withdrawable to your wallet and 30% is credited to your E Wallet.

70%

Profit to Wallet

Withdrawable together with **100% of your capital**, sent to your BEP20 wallet as ETH. Referral, level and pool income are also 100% withdrawable.

30%

Profit to E Wallet

30% of the cycle profit is held in your E Wallet for reinvestment. It can fund up to **50%** of any new investment; the rest comes fresh from your wallet.

Worked Example

1. **1.00 ETH cycle completes**
   Slab 4: 1.0% daily × 13 days = 0.13 ETH profit. You renew first.
2. **1.091 ETH → your wallet**
   1.00 ETH capital (100%) + 0.091 ETH profit (70%), withdrawable with no fee.
3. **0.039 ETH → E Wallet**
   30% of the profit stays in the system as your reinvestment balance.
4. **E Wallet funds up to 50% of the re-top-up**
   Your E Wallet balance pays part of the next renewal; at least half is always fresh ETH.

CAPITAL 100% · PROFIT 70% PAID OUT · 30% OF PROFIT TO E WALLET · E WALLET COVERS UP TO 50%

6 Ways to Earn in CycleETH

One investment unlocks six parallel income streams. Streams 1 and 2 are open to everyone. Streams 3 to 6 grow with your Star rank.

01

Self Income

Daily profit on your own investment: 0.5% to **1.2% per day** by slab.

02

Direct Income

5% of every investment made by a member you directly refer.

03

Level Income

Earn from investments across **20 levels** of your team. Unlocks at 4 Star and 5 Star.

04

Star Rank Income

Five Star ranks based on self investment and team business. Higher rank, deeper levels and pool access.

05

Daily Lucky Pool Income

Two daily pools: **Self Team Pool** (0.2% / 0.5%) and the **Global Pool**, both settled every 24 hours.

06

Global Pool Income

0.3% of all new first investments made globally each day, distributed within 24 hours.

SELF · DIRECT · LEVEL · STAR RANK · DAILY POOLS · GLOBAL POOL

STREAMS 01 & 02

Self Income & Direct Income

The two streams every member earns from day one, with no rank requirement.

STREAM 01 · SELF INCOME

Up to 1.2% / day

Paid daily on your own investment for the length of your cycle.

- 0.01–0.1 → 0.5%
- 0.11–1 → 0.7%
- 1.1–2 → 0.9%
- 2.1–4 → 1.0%
- 4.1–6 ETH → 1.2% · 36% monthly

STREAM 02 · DIRECT INCOME

5% of Invest

Every time a member you personally referred invests or re-tops-up, you instantly receive 5% of that amount.

✓ **Open to all ranks**
1 Star to 5 Star all receive the full 5% direct income.

✓ **Instant, on-chain**
Credited by the smart contract the moment the investment confirms.

✓ **Example**
Your direct invests 2 ETH → you earn **0.10 ETH** immediately.

NO RANK NEEDED · **EARN FROM DAY ONE** · DAILY PROFIT + 5% ON EVERY DIRECT
